RICERCA

E SVILUPPO

Tutto parte da un'idea. Il designer si occupa del telaio, il product manager delle componenti, l'ufficio tecnico dello sviluppo dei campioni.

Ma l'idea è comune, condivisa. Qui in MBM ogni bicicletta nuova è frutto dell'unione di tante persone diverse, con competenze e pensieri unici: forse è proprio questa la nostra grande forza.

Il nostro reparto di ricerca e sviluppo fa sì che tutto quello che offriamo nelle nostre bici sia tecnologicamente avanzato e qualitativamente superiore.

Ogni singolo dettaglio è pensato per apportare un miglioramento effettivo ed efficace alla bici: **l'esperienza positiva dei rider è quello a cui aspiriamo.**

Già ora stiamo lavorando per creare nuovi modelli che siamo sicuri saranno un successo.

RESEARCH AND DEVELOPMENT

It all starts from an idea. To make it real, everyone has to play their part: the designer is in charge of the frame, product managers carefully select components, while the technical department makes sure that everything is according to specs. This is how each new MBM model is created.

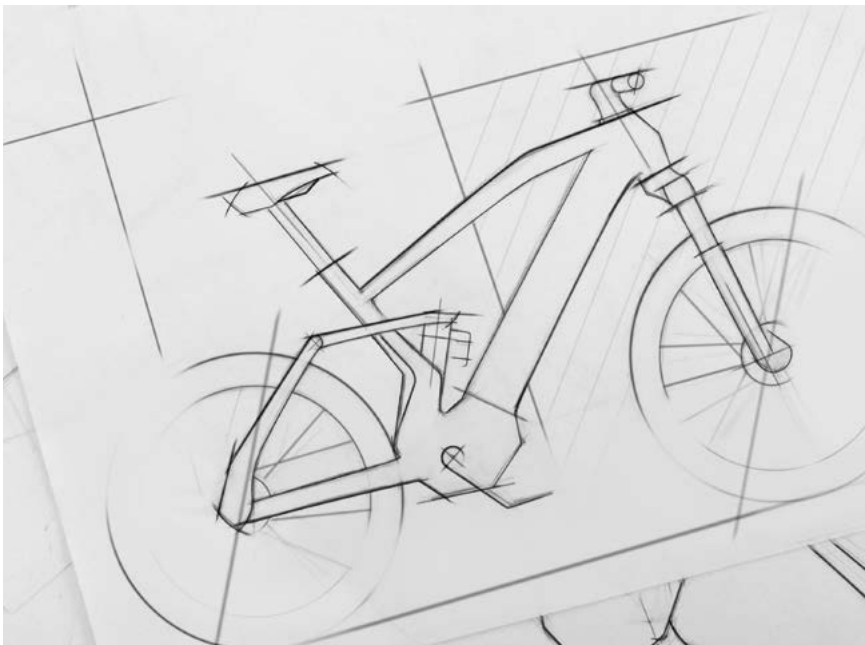

That's a team of people working on the same goal, sharing the same passion. Some may say this is the key to our strength.

But what's the ultimate target? **For us, it is the rider's satisfaction.**

Each detail of our bikes is conceived to provide an enhanced riding experience. We achieve this by choosing technologically advanced and high end components for our top notch frames.

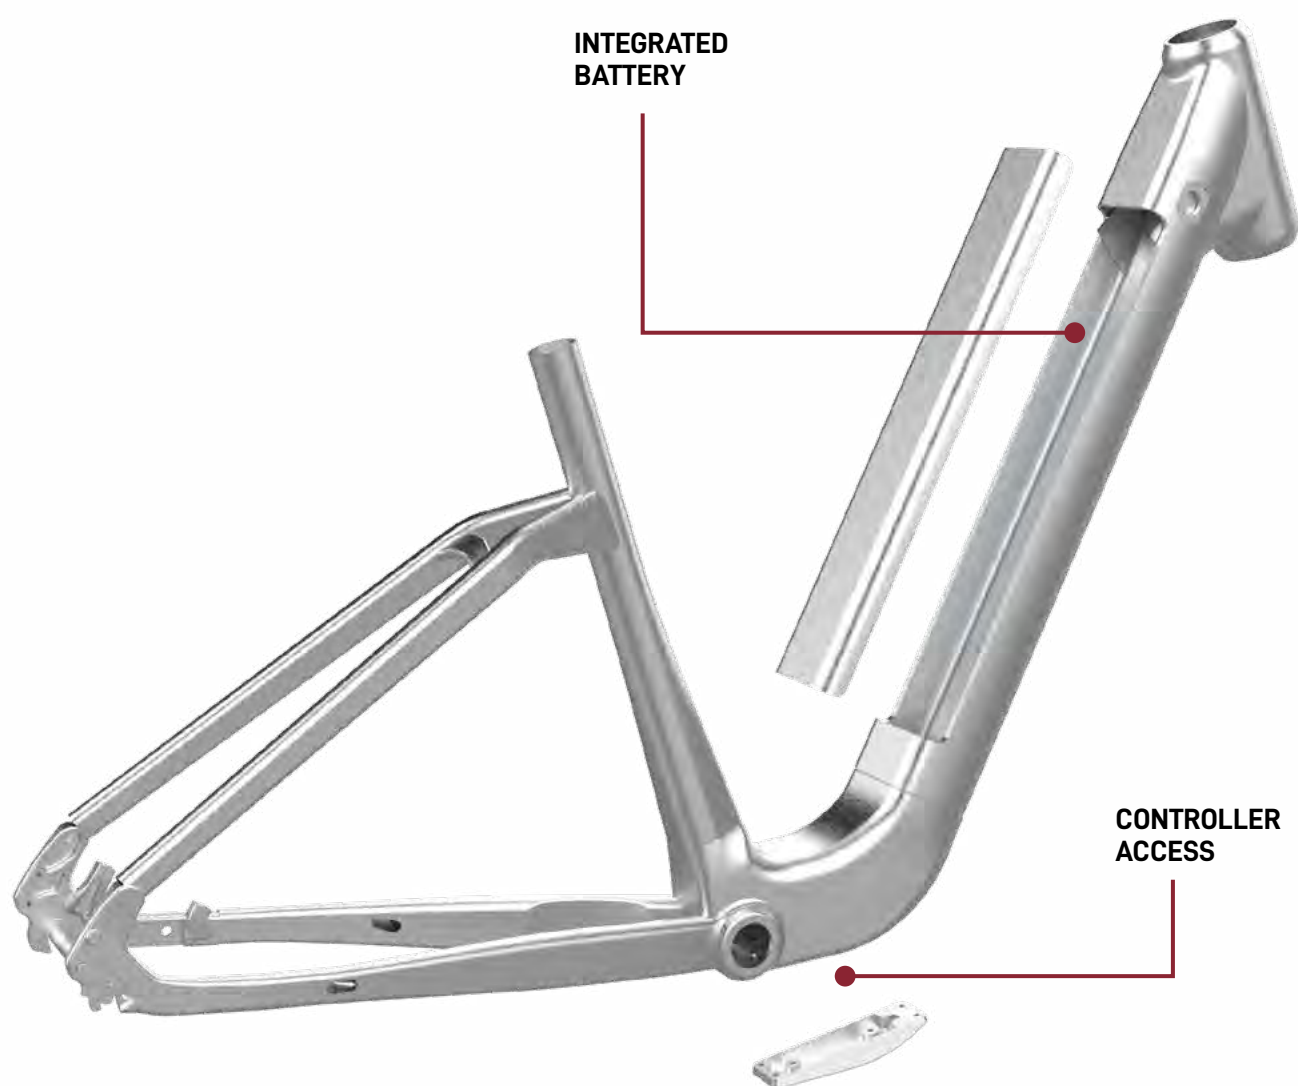

While you are reading this, we are already working on some new exciting models.

Stay tuned!

GRAVEL

KERES, una gravel ultra leggera dal design innovativo in versione elettrica (Keres Plus) e muscolare (Keres). Il telaio in alluminio è elegante, dinamico, con tubi idroformati e linee nette e pulite. La forcella multi-funzionale è in carbonio, per perno passante **M12**, e presenta l'integrazione del cavo freno e il supporto per parafranghi.

Il movimento centrale è completamente integrato nel tubo obliquo, con i posteriori bassi saldati direttamente sul tubo piantone.

Nella Keres Plus la batteria è totalmente integrata nel tubo obliquo, e protetta nella parte bassa da un coperchio in plastica realizzato su misura per completare il design pulito della bicicletta. E' possibile alloggiare nel tubo sella una batteria supplementare **FSA da 252 Wh/7 ah 36V** (non compresa), che può essere direttamente collegata alla presa di ricarica.

In tutto il telaio i cavi sono perfettamente integrati, in particolare i foderi bassi sono stati progettati per proteggere e guidare i cavi motore: la pulizia delle linee è alla base di questo progetto, per unire prestazioni e bellezza.

KERES, an ultra-light gravel bike with a cutting-edge design available in two versions: e-bike (Keres Plus) and normal (Keres). The hydroformed alloy frame is elegant and dynamic, with sharp and defined lines. The multifunctional carbon fork for **M12** thru-axle features an integrated brake cable access and fender support.

The innovating bottom bracket is integrated to the downtube: this new positioning allows for the chain stays to be directly welded to the seat tube.

Keres Plus battery is fully integrated inside the downtube, and protected at the bottom by a customized plastic cover. A supplementary **FSA of 252 Wh/7 ah 36V** battery (not included) can be added on the seat tube and connected directly to the charging socket.

The chain stays peculiar design covers and guides the motor cable, and all the other cables are perfectly integrated into the frame, combining elegance and performance.

KERES PLUS

⚡ 42 Nm
